

Generation of large scale screening methods of attachment assessment

Dr Maki Rooksby

Research Associate (post-doctoral researcher)

Institute of Health and Wellbeing, College of Medical, Veterinary and Life Sciences, General Practice and Primary Care, University of Glasgow

Date Wed, 5 July, 2017

Time 13:00 – 14:30

Place Bldg. D 4th Floor

Graduate student room,

Research Center for Child Mental Development

Dr Maki Rooksby works for the School Attachment Monitor (SAM) project, a study to automate the key steps and features of a well-validated Manchester Child Attachment Story Task [MCAST: a representational attachment measure for middle childhood]. The study is a multi-disciplinary effort with colleagues in the School of Computing Science also at the University of Glasgow. Prior to joining the team, Dr Rooksby trained as a developmental psychologist and worked for a number of projects on child development and more recently on health research with adults with children.
