

Journal of Neuroendocrinology

Oxytocin transport across the blood-brain barrier by membrane receptor for advanced glycation end-products (mRAGE) and endogenous secretory RAGE.

- **Editor Invited Review: The relation between thyroid dysregulation and impaired cognition/behaviour**
- **Review: Melatonin and osmoregulation in fish: smoltification in salmon**
- **Transport of oxytocin to the brain by membrane-bound or soluble forms of receptors for advanced glycation end-products**

WILEY
Blackwell

JNE is owned by the British Society for Neuroendocrinology (BSN), and is the official journal of the European Neuroendocrine Tumor Society (ENETS).

It is also the official journal of the Pan American Neuroendocrine Society (PANS), Hypothalamic Neuroscience and Neuroendocrinology Australasia (HNNA), and the International Regulatory Peptide Society (IRPS), and an official journal of the European Neuroendocrine Association (ENEA) and the International Neuroendocrine Federation (INF).
