

Important issue: Job support that helps autistic people participate in society and find their place (or find a meaning in life).

Why: There lacks a proper education and information system to help people understand those with autism.

[Special districts]

Aim to establish a national model district with a support system to help autistic people find employment. This can be achieved by carrying out an accurate survey of the current situation, medical research, economic experimentation, supporting education programs and developing human resources.

We aim to work on intensive and effective problem-solving which will attract worldwide attention on Ishikawa prefecture.
